Technology

Injection Molding Technology

TAV Dental is Using a Unique Technology throughout Production.

Advanced technology is the primary basis for all development and production processes at TAV Dental. We always strive to use advanced technology and the most innovative manufacturing processes in order to bring this novelty to the dental industry.

Our manufacturing processes are based on state-of-the-art of technology. TAV Dental's new product line and **injection molding technology** assures a high reliability level and guaranteed performance.
